DETAILED ACTION

1. This Office action is response to the amendment filed 12/01/03, the amendment has been reviewed. Original claims 1-27 are cancelled; claims 28-55 are added. The objections and rejections cited are as stated below.
2. Newly submitted claims 37-38 and 52-55 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the instant claims' subject matter coincides with subject matter of claims 14-21 and 23-27, as originally filed, in which the applicant withdraw from consideration, as stipulated in the remark. Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 37-38 and 52-55 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.
3. The drawing correction to Figure 28 is acknowledged.
4. Regarding, the response to rejection under 35 U.S.C. 112, applicant submitted that the primary connection information and identity information is clearly defined in page 10, line 27-Page 11, line 4. Although the examiner disagreed that the teaching in cited passage is clearly not defined the phrases, however examiner has taken that the primary connection information is any information, which is used for electronically establishing connection, e.g., telephone number, or IP address. The identity information is referred to any address related to the primary connection information owner, which may includes name, sex, profile
5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it

Art Unit: 2143

pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

6. The specification is objected to under 35 U.S.C. 112, first paragraph, as failing to adequately teach, in such clear and concise manner to enable an ordinary skill in the art to pertain, make and use to invention without undue experimentations, i.e., failing to disclose how ton displays the identity information on a second communication device to the operator of the first communication device, prior to the connection is being made (see wherein statements 2, 4 and 5). In addition the specification failed to discloses how the primary connection and identity information for the connected device is send to a device, which is not connected to the second communication device at the time, as recited in claims 29-32.

Applicant's disclosure is insufficient to allow one of ordinary skill in the art to make or use the invention without undue experimentation because applicant did not adequately disclose the necessary apparatus to perform the claimed method. See In re Gunn, 190 USPQ 402, 406 (CCPA 1976

7. Claims 28-36 and 39-51 are rejected under 35 U.S.C. 112, first paragraph, for reason set forth in the objection to the specification.

It is suggested that applicant could overcome 112/first paragraph rejection by providing a suitably detailed system diagram (with appropriate cross-indexing in the detailed description to reference numerals on said system diagrams) or the claim can be made clear that the operator referred thereto, is an operator of the second communication device. No new matter should be added.

8. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Art Unit: 2143

9. Claims 28-36, 39-51 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

10. Regarding claims 29-30, the phrase “its operator” renders the claim(s) indefinite because it is not clear whether which device’s operator, it’s referred thereto, thereby, the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

11. Regarding claim 30, the term “itself” renders the claim(s) indefinite because it is not clear whether which device, itself referred thereto, thereby, the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

12. Regarding claims 28-30, the term “the identity information” renders the claim(s) indefinite because the identity information is preceded with three different identities information, it is not clear whether which identity information referred thereto, thereby, the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

13. Claims 31-32 recite the limitation “the identity information and primary connection information received from another device”. There is insufficient antecedent basis for this limitation in the claim.

14. Regarding claim 32, the term “the connected communication device” renders the claim(s) indefinite because there are many devices connected to the each other, as recited in claim 30-32, it is not clear whether which device applicant referred thereto, thereby, the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

15. Regarding claims 35, 43-46 the phrase “which communication device” renders the claim(s) indefinite because there are many devices connected to the each other, as recited in

Art Unit: 2143

claim 30-32, it is not clear whether which device applicant referred thereto, thereby, the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

16. Claim 40 recites the limitation "the authorization is obtained". There is insufficient antecedent basis for this limitation in the claim.

17. Applicant argument regarding claims 28-30 is found persuasive; the prosecution could be advance upon amending to overcome the rejection above.

18. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
